Li9 combines deep technical expertise with real-world business insight to deliver solutions that provide both IT and business value.

We partner with diverse solution providers ranging from open-source based solutions from **Red Hat** and **IBM** to various complementary vendors to craft end-to-end systems that optimize operations, manage costs, and mitigate risk.

Areas of Expertise

Modern DevOps

Li9 leverages best-in-class DevOps practices to streamline software delivery and reduce deployment risks. By automating workflows and integrating cutting-edge toolchains, we help organizations accelerate release cycles, maintain higher code quality, and foster a culture of continuous improvement.

Intelligent Automation

Through innovative process automation, Li9 helps organizations minimize manual tasks and achieve better consistency, scalability, and agility. By harnessing AI-driven insights, we simplify complex workflows and free up teams to focus on higher-value initiatives.

Integrated Security

Our integrated approach ensures that security protocols are baked into every phase of a project—protecting data, applications, and infrastructure in both on-premises and cloud environments. We align with the latest industry standards and most recent updates.

Cloud-Native Solutions

Li9 specializes in architecting and deploying cloud-native solutions that span on-premises environments to public cloud platforms. From containerization and microservices to serverless computing, our experts design flexible infrastructures.

Success Stories

1. Financial Services: Rapid DevOps Transformation

A leading financial services firm partnered with Li9 to modernize its development pipeline. Through containerization, automated testing, and continuous integration, the firm reduced deployment times from weeks to days, while maintaining rigorous compliance standards.

2. Healthcare: Intelligent Automation & Security

A healthcare provider sought to optimize patient data management while preserving stringent security controls. Li9 integrated intelligent automation with end-to-end encryption, enabling efficient data handling without compromising on compliance. The provider reported reduced errors, faster processing, and improved patient outcomes.

3. Retail: Cloud-Native Migration

A global retailer needed to migrate legacy applications to the cloud for better scalability and uptime. Li9 designed a cloud-native architecture that simplified operations, cut costs, and enabled the retailer to rapidly scale during peak shopping seasons.

4. Global Consulting Firm: Modernizing Kubernetes with OpenShift

A multi-billion-dollar global management consulting firm recognized challenges in its AWS EKS environment—high operational costs, inconsistent standards, and limited multi-cloud flexibility. Li9 performed a thorough TCO analysis, set up a full production environment with Red Hat OpenShift and Ansible, and rapidly migrated production workloads. The result was millions in cost savings, faster time-to-market, and a future-ready, multi-cloud infrastructure.

Approach & Methodology

1. **Discovery & Assessment** – We begin by understanding your current state, strategic objectives, and pain points.
2. **Solution Design** – Our architects craft a roadmap tailored to your organizational goals, integrating best-fit technologies and approaches.
3. **Implementation & Integration** – Using hands-on engineering, Li9 ensures seamless integration across new and existing systems.
4. **Optimization & Support** – Our ongoing support and continuous improvement framework ensure that solutions remain aligned with evolving business needs.

Why Li9?

Driving IT and business value through Modern DevOps, Integrated Security, Intelligent Automation, and Cloud-Native solutions.

- **Deep Technical Expertise & Business Insight** – Our teams combine specialized technical skills with a solid understanding of business outcomes, ensuring technology investments truly add value.
- **Partnerships with Leading Providers** – We work with market leaders (e.g., Red Hat, IBM) and a broad ecosystem of solution vendors to ensure your environment is robust, secure, and future-ready.
- **Proven Track Record** – From finance to healthcare and retail, our success stories reflect Li9's ability to innovate, optimize, and deliver tangible results.
- **Scalable, Flexible Solutions** – Whether you're modernizing on-premises infrastructure, adopting public cloud platforms, or a hybrid approach, Li9's solutions evolve alongside your business.
